

Updates

As we head into the new year we anticipate work to move quickly on the Fitness Expansion. The steel framing work has been moved back one week and will start on January 12. Despite this delay the overall project is still on schedule to be completed in May. In the next month the appearance both outside and inside the Fitness Center should change dramatically.

We expect that our facility use will pick up in January as many members get started on their New Year's resolutions. With the construction going on, the limited space and one unusable exit in the Fitness Room, we really need to pay close attention to the number of members using the room. We want to be sure that our members have a safe environment to work out in. With this being said, we would encourage members to use the alternate equipment in the hallways. We would also encourage anyone that has the flexibility in their schedule to avoid the busy evening hours between 6pm and 9pm Monday through Thursday. We appreciate your patience as we continue to work on expanding the Fitness Center for you.

What to Expect

Next Week:

- Minor interior work will continue on the southeast corner of the Fitness Center, behind the black plastic.

Near Future:

- Work on the steel framing/structure for the expansion should begin the second week of January.
- The expected timeframe for some of the major relocation of equipment has moved to mid-February. At this time we also expect to have the relocation of interior doors and entryway upgrades complete.

Impacts to Members

With the construction of the building frame we anticipate that there will be some additional noise coming from the exterior of the building. Additionally, as work on the interior office moves towards completion we may have some interior noise as well.

Tell Us What You Think

While we anticipate some impacts during construction, the staff at the CRC is committed to mitigating these impacts as much as possible. Let us know how we are doing, by filling out a comment card, talking to our staff, or emailing us at chris.ghione@mhcrc.com. We really feel the final project will be "worth the weight".
